THE BELLS BENEATH BRACKENFORD

Kael Drakeshield | Session 5

Starfall Spire

Used the astrolabe to locate an old observatory in the mountains known as Starfall Spire.

The observatory had been abandoned for decades.

Found a hidden study containing the papers of several wizards. One collection belonged to Eldrin Valtoris.

Important discovery: Eldrin had studied residual magical energy left inside a person's body after powerful healing spells.

One document referred to "shadow echoes" as a possible side effect of exposure to planar energy.

This may explain Echo.

The document also mentioned an experiment involving a wounded soldier. No name given, but the dates seem to fit my own injury.

Karma discovered a strange shadow moth in the observatory. It disappeared when touched.

Faelan found a collection of notes about blood acting as a conduit for planar magic.

Idris accidentally activated a magical lens which projected a map of Brackenford beneath the observatory ceiling.

We found three marked locations:

1. Bellfoundry.
2. Old river district.
3. Saint Orra's Reservoir.

Combat with animated armour and two magical constructs.

Initiative:

- Kael 18
- Niko 16
- Construct A 14
- Karma 12
- Faelan 10
- Idris 7

The constructs seemed to react to the astrolabe. One of them repeatedly attempted to retrieve it.
