THE BELLS BENEATH BRACKENFORD

Faelan Haversham | Session 7

Research and Preparations

Met Ysabet Rusk, Sister Anwen and Elira Thorne.

Ysabet explained the three seals:

1. Bellfoundry.
2. Drowned Archive.
3. Saint Orra's Reservoir.

The first two are already damaged.

The final seal is the one Othric intends to destroy.

Niko's research

Anwen provided a partial treatment formula for vampirism.

Required ingredients:

- Moon-salt.
- Heartwood harvested near a Shadowfell crossing.
- Blood from a vampire who has willingly rejected their master.

The last ingredient is particularly interesting. It implies that vampirism may involve a magical bond that can be broken through conscious rejection.

Formula incomplete. No known success rate.

My research

Ysabet recognised some of my haemocraft diagrams.

She suggested that the Ashen Choir once studied blood as a means of stabilising planar magic.

She was unwilling to discuss the original researchers.

Need to revisit this.

Kael

Asked Ysabet about Eldrin. She admitted that he had previously worked with the Choir, before its current leadership took control.

This may explain the documents at Starfall Spire.

Karma

The shadow moth continues to appear near her. Its behaviour suggests a connection to the planar disturbances.
