THE BELLS BENEATH BRACKENFORD

Karma | Session 8

BIG MACHINE UNDER THE RESERVOIR.

The Gloam Engine.

It was enormous. Rings and a black crystal and a very bad wizard.

Othric was doing something with the astrolabe.

Then shadow creatures came out of the giant hole.

Everything became extremely loud.

Kael and Echo attacked Othric.

Faelan attacked the floor writing.

Idris did engineering things.

Niko got the astrolabe.

I did magic things.

The machine started falling apart.

Othric vanished into the hole. Hopefully he went somewhere unpleasant.

Water started flooding the room.

We escaped!

Elira paid us.

The moth is gone again.

I think it was saying goodbye.

Things I want to investigate:

- Eldrin and Kael.
- Where Othric went.
- Whether the Gloam Engine can be repaired.
- Why does the bell sound different when magic is happening?

- Can the moth come back?
